

Set up your loom with 8 warps. Warp into each groove for the first four, then skip two grooves, then warp the last into each groove.

The pattern alternates each row:
(1)11, (1)cube, (1)11, (1)Crystal,
(3)11/0, (1)Cube, (1)11/0.

Then:

(1)11, (1)cube, (3)11, (1)Crystal,
(1)11/0, (1)Cube, (1)11/0.

Tips: If you'd like to do the weaving in method that pulls the warps back into the work, be very sure not to stitch through any thread when looming.

Attach the 9-hole finding to each end as shown in the first illustration. Attach the border as shown in the second illustration. Refer to this [video](#) for step-by-step detail.
